

## MONSTER SET 8 - Assembly Instructions. (Mortimer, Agnes and The Scarecrow)

You'll need: Glue and Scissors.

Begin by cutting out the body section. Don't separate the panels, just snip out the entire piece. Fold the back panel and the blank panel both **DOWNWARD** along the black lines. Glue the back panel directly over the blank panel, allowing the front panel to curve slightly as shown in figure 1a. Then fold the top panel **DOWNWARD** along the black line and glue it over the back of the head as shown in figure 1b. You should now have a hollow body with a flat back and a curved front.

Next cut out the arm section along the outer red lines. Fold **DOWNWARD** along the black center line. Smear glue between the two halves and glue them together. Then carefully cut away the white area around the arms. Place the finished arm piece in position and glue to the back of the monster as shown in figure 2a.

Now snip out the base piece. Fold the two half circles **UPWARD** and then lay them flat and slide them together as shown in figure 3a. While holding them flat, press the two middle squares together and crease the top edge. Be sure the base sits flat on your tabletop, and then glue the two middle squares together. Cut out the large black square, place it face down, and glue the base on top of it. This will strengthen the base greatly, and will also make the finished model look nicer. Cut away the extra paper around the bottom circle to finish the piece. The base should now resemble figure 3b. Slide the base into the body and glue it to the inside **BACK** of the body section as shown in figure 3c. The monster's body should now stand upright.

That completes Agnes and The Scarecrow. To finish Mortimer, we'll need to add his cane. To assemble the cane, cut along the red outer lines. Fold **DOWNWARD** along the black center line and then glue the two sides together. Cut away the white area around the cane. Gently curve (do not crease) Mortimer's right elbow upwards, and then curve his right wrist downwards (as shown in figure 4a). Glue the top of the cane to the back of Mortimer's hand. The cane's tip should rest on the base (as shown in figure 4b).

And there you have it! Your new friends are complete and ready to join your collection.
